Addressees:

I am enclosing two new pages, 14 and 15, for the April 30, 1991, Market Sample 33 Report to correct entries for Merit De-Nic Ultra Low Tar KFSP and KFMSP and for Next De-Nic Ultra Low Tar KFSP and KFMSP. Pseudo rounded values were left unconverted to "< 0.05" by our data processing program--a bug believed to be corrected. The new entries make these data consistent with those reported in the test results section.
